

# FlashROM 99 Compatible Files

Last update: 4/04/2017

## STARTER PACKS

There is a link to a rather large starter collection of files OFF-SITE at WHITECH, the files were compiled by the creator of the FlashROM99 . For these files, please << [CLICK HERE](#) >>, it's easy to overlook.

If you are running a TI without a 32K memory upgrade in one it's various forms, you'll probably want to download the nice 'Starter Pack' compiled by Atari Age user [00WRex](#). It's available << [in message #12 of this thread](#) >>.

There are lots of files for the FlashROM 99, and it's very easy to lose track of all the programs! If there is something you've not been able to find (like a Rasmus game) be sure to check the starter packs!
