EXPANSION MODULE #2

#2413 EXPANSION MODULE #2

Expansion Module #2 turns ColecoVision™ into the cockpit of a high performance race car and provides realistic sports action! The module comes with a table top console including a large arcade style steering wheel and an accelerator foot pedal that operates from the floor. The regular ColecoVision™ controller mounts in the driving module console and becomes the gear shift. The accelerator pedal is stored within the console when it is not in use.

Included with this module is the Turbo™ game cartridge. In this fast paced, three dimensional racing game, you control a car that must be driven through city streets and tunnels, down country roads and over bridges. While controlling the car's speed and direction, you must pass speeding cars, avoid treacherous obstacles—and still complete the course in record time!

Other driving cartridges, for use with this module, will be available soon.

ColecoVision™ Controller included with ColecoVision™ Video Game System.

TURBO™ is the trademark of Sega Enterprises, Inc. © 1981 Sega Enterprises, Inc.
