

# Jogger & Reflex

TWO CHALLENGING VIDEO PROGRAMS

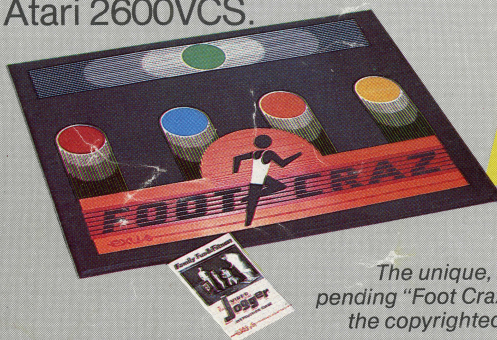

Graphics alive! Two tracks — *Competition* (approx. 7-minute mile rate); and *Funtastic* (approx. 10-minute mile rate)

The lively all-time conditioner. Fun to do, and sharpens reflexes, too.

**HOME BECOMES A PRIVATE GYM** EXUS, the high-technology company, has added a captivating new dimension to **home fitness and health** with the introduction of **Jogger** and **Reflex**, exciting exercise programs that interact with TV, using the Atari 2600VCS.

The unique, patent-pending "Foot Craz" pad activates the copyrighted exercise programs.

Ready-made market...  
Plays on  
Atari 2600 VCS...  
16 million  
have been sold!

Two new video exercise programs included with each "Foot Craz" activity pad.

# Jogger & REFLEX

## FEATURES AND SPECIFICATIONS

### FOOT CRAZ

Double layer, high-impact foam cushion pad, 30 inches long, 24 inches wide, and 1 inch thick. Removeable cover is made of high-test, washable nylon. Brilliant, stay-fast color symbols enhance the product design. 6-foot-long cable with Atari 9-pin connector plugs into an Atari 2600VCS. No tools necessary for hook up.

### JOGGER... now you can jog indoors!

The **Jogger** exercise program offers a range of 4 speeds. A lap around each track is equivalent to approximately 35 yards. Lap counts and time run are measured in miles by reference to a conversion table supplied. The symbol of the runner on the track is followed by a "pace bear" to challenge the "in-home athlete." **Jogger** takes the boredom out of running. It is an excellent trainer for those who want to begin a jogging program, or trim off pounds.

### REFLEX... the ultimate conditioner!

There are 9 variations of **Reflex**, and, in each, 50 levels of difficulty. It helps to develop physical coordination while conditioning. 10 minutes with **Reflex** is a real workout. **Reflex** is the ideal trainer for those participating in aerobics, jazzercise, tennis, soccer, football, track and field. To exercise with **Reflex**, the participant steps on the colored circle on Foot Craz that corresponds to the square on the TV set in which a "bug" appears. Occasionally a "butterfly" appears in a square. If the player steps on it, points are lost. It requires quick, accurate response from the player. Total points earned and time spent are digitally displayed on the TV screen to encourage competition among players.

Both **Jogger** and **Reflex** are compatible with the Atari 2600VCS

### PACKAGING

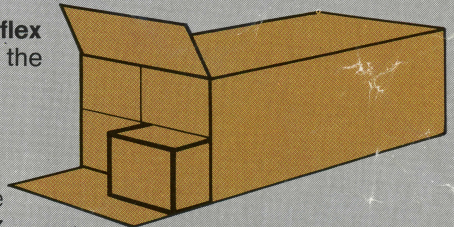

**Jogger** and **Reflex** cartridges and the unique Foot Craz

activity pad are packaged in an attractive self-selling display carton. An illustrated booklet featuring training instructions, and nutrition and health hints is included, too. The display carton with products enclosed weighs approximately 5½ pounds. It is 25½" long, 8⅝" wide, and 7¼" high. Each display carton is packed in a corrugated 4-Pak, which weighs 23 pounds, and is 25½" long, 17¼" wide, by 14½" high.

Terms: Net 30 days from date of invoice

Freight: FOB, San Jose, CA

All sales final. Approval to return merchandise must be secured in advance.
