

JOY•SENSOR™

Look Ma, no stick! It's the joystick without the stick—the touch sensitive joystick controller. This electronic, digitally simulated controller has just the right combination of control and response—the slightest touch of your finger is all it takes to control movements on your game screen. Rock your finger or thumb back and forth—and it seems like Joy•Sensor reads your mind when you're ready to fire. Your fingers want your legs to run out and get Joy•Sensor—right now.*

* Joy•Sensor's rapid fire may not operate on all systems.

Model JSR

JOY•SENSOR™ FOR COLECOVISION*

If you've been waiting for a great joystick for your Colecovision, wait no more. It's here. It's Joy•Sensor, the digitally simulated joystick controller so technically advanced, it doesn't even have a controller stick or conventional firing buttons. Instead, it has touch sensitive controls. It gives you speed you didn't know you had. All your control movements are faster—because you don't have to move your entire hand or arm, just your finger or thumb. This Joy•Sensor is strictly to bring your Colecovision alive.

Model CSR

SLIK STIK™

If you want a joystick that's comfortable to your hands but doesn't cost an arm and a leg, you want Slik Stik. Even if your allowance is limited, it won't take long to save up for Slik Stik. And it plays great. Even world champion video game players agree that Slik Stik controls your game so precisely, play takes on a whole new dimension. Comes with extra long cord—and the extra small price. Slik Stik from Suncom, because we know all kids aren't millionaires.

Model SSK

SNAPPER™ FOR COLECOVISION*

Somehow, the Coleco joystick doesn't quite seem like it's all there. But Snapper takes care of that—fast! It's the snap-on joystick height-extender specially designed for Colecovision controllers. No disassembly of controller is required. With Snapper, you know what it takes?—just a snap! No unscrewing. No gluing. No wonder it's such a popular item for Colecovision.
