The Volcano Fortress

Background

Many years ago, a very powerful wizard used his great magic to carve a fortress into a mighty volcano. For generations, thousands of explorers have searched for this fortress to obtain the treasures that taunt from legends and fables. However, none but you have discovered the secret entrance to this volcano fortress. The legends say inside the fortress lies many wonderful treasures; giant diamonds, wondrous magic items, weapons beyond number, and four great enchanted chests which contain more treasure than can be imagined. Your quest is to find the four chests and the four keys that unlock the chests. However, the legends also say that the wizard's fortress is not unguarded. It is said that he created metal demons (called "robots") and summoned the evil undead to protect this treasure. Incredible though it sounds, you have heard that some of these creatures are invisible, and thus cannot be seen until they attack! Good luck in your quest.

Command Summary

- E (Up Arrow) - Moves your party in desired direction through rooms and hallways. Also is used to position your cursor when firing a ranged weapon.
- X (Down Arrow)
- S (Left Arrow)
- D (Right Arrow)
