Distributed by Asgard Peripherals for the exclusive use of  
owners of the AMS and AEMS devices.

-----

This package consists of the following:

- AEMS System "Boot", version 2.0.
- AEMS Macro Assembler, version 1.2
- AEMS Object Library, version 1.3
- AEMS Object Linker, version 1.1

These files are archived with the program Archiver, version 3.03g. Archiver is a Fairware product by Barry Boone, and it is requested that you send a donation if you find this product useful. This program is included on this basis with this package.

You will find the following files on this disk:

- \*README - This document
- AEMSASM1/A - Archive #1 of the AEMS Macro Assembler.  
Requires 720 sectors.
- AEMSASM2/A - Archive #2 of the AEMS Macro Assembler.  
Requires 720 sectors.
- AEMSLIBS/A - Archive of the AEMS Object Library.  
Requires 720 sectors.
- AEMSLINK/A - Archive of the AEMS Object Linker.  
Requires 720 sectors.
- AEMSSYS/A - Archiver of the AEMS Boot System.  
Requires 360 sectors.
- ARC3 - The Archiver program. Load through E/A option #5.

To de-archive these files, first prepare a quantity of formatted, blank disks. If you have DS/DD disk drives, you will need at least 2 and likely 3 blank disks. This system requires as a minimum DS/SD disk drives (& five 720 sector disks).

## AEMS DEVELOPMENT SYSTEM CONTENTS

-----  
AEMSASM1/A  
-----

THIS DISK CONTAINS THE FOLLOWING FILES:

1ST/README	Disk contents description
2/HISTORY	Updating history
